- June 25 -Two additional VSPCs open (Independence Center and Monument Town Hall)

Military & Overseas Voters

We work to ensure that military and overseas voters are able to vote as efficiently as possible from far away locations. These voters are called "UOCAVA" voters, termed by the Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA). This special class of voters includes men and women serving in the armed forces, their dependents, and others whose circumstances take them out of the country.

- UOCAVA Ballots mailed to 1445 voters, emailed to 2568 voters
- Ballots Returned-169

• 141,715

Total who picked a preference 3,719

- Republican preference
• 2133 voters
- Democratic preference
• 1586 voters

OR

Our Elections team members took the “U” on the road! The UChooseCO Campaign, developed by the Colorado Secretary of State’s Office, provided the opportunity for education and outreach to voters. Numerous outlets were utilized to inform unaffiliated voters about the voting process for the Primary Election.

Ballot Security

- Conduct L&A (logic and accuracy test), of all ballot counting equipment that will be used for the Primary Election.
 - Central Count Optical Scanners
 - Voter Service and Polling Center electronic voting machines.
- Equipment is certified by Election Assistance Center and the Secretary of State
- Access control-Cipher locks, 24/7 camera surveillance
- Air-gap Network
- Password control-Two factor encryption
- Chain of Custody
- Bipartisan teams
- Canvass
- Risking limiting audit-Gold Standard

Primary Cybersecurity

Members of MS-ISAC and EI-ISAC (Election Infrastructure Information Sharing and Analysis Center)-Role is to monitor and mitigate cyber threats for government around the clock.

Partnering with Secretary of State's Office and Homeland Security-assessments, penetration tests, phishing attacks.

The Cybersecurity 202: How Colorado became the safest state to cast a vote

By [Derek Hawkins](#) May 10 [Email the author](#)

THE KEY

- Switch to paper ballots or voting machines that produce a paper trail. This creates a physical record of the vote and, unlike electronic voting machines or machines connected to the Internet, hand-marked ballots can't be hacked.

- Check the results using a “risk limiting audit,” which counts a sample of ballots by hand and compares them to machine tallies and is especially effective in close races. While a majority of states require post-election audits, experts widely agree that only risk-limiting audits are comprehensive enough to detect a cyberattack.

- Conduct frequent and rigorous risk assessments — and make sure election workers are well trained to identify it when something goes wrong.

Process improvements-Ballot Sorting and signature verification

- Runbeck Agilis - The Elections Division purchased a new high-tech sorting machine to increase the efficiency and timeliness of mail-ballot sorting.
- Increase the number of signatures verified
- Automation of a manual process-reduces labor costs
 - Scans and extracts signature images for verification processes that require original voter signatures.
 - Processes up to 10,000 pieces per hour

Election returns to date

- 20,011 ballots returned (5.2%)
- Democratic-5,036 (6.25%)
- Republican-10,756 (6.9%)
- Unaffiliated-4,219 (3%)

Primary Election

- Election Day, June 26-Ballot due by 7:00 pm
- Call 575-VOTE (8683)
- Epcvotes.com

Tips

- Return early
- Legibly sign the back of your ballot
- If an Unaffiliated voter, return just one ballot
